

# Welcome to MuPDF.js

Please understand that AGPL licensing does not necessarily mean this is free software!

There are terms especially regarding commercial use. Find out more at: <https://artifex.com/licensing>

Welcome to the official MuPDF.js library from **Artifex** - the maintainers of MuPDF.

This is a build of **MuPDF** for **JavaScript** and **TypeScript**, using the speed and performance of **WebAssembly**.

The **MuPDF.js** library can be used both in browsers and in Node.js.

## Features

---

- Render PDF pages to images
- Extract text and images from PDF
- Edit PDF documents
- Search PDF file text contents
- Create and edit PDF annotations
- Access and fill out PDF forms
- Supports basic CJK (Chinese, Japanese, Korean) fonts

## License and Copyright

---

MuPDF.js is available under Open Source **AGPL** and commercial license agreements. If you determine you cannot meet the requirements of the AGPL, please **contact Artifex** for more information regarding a commercial license.

## Documentation

---

For documentation please refer to [mupdfjs.readthedocs.io](https://mupdfjs.readthedocs.io).

## Code Examples

---

Check out the [example projects](#) to help you get started. The examples include a simple PDF Viewer that runs MuPDF in the browser, several command line scripts, and more!

## Getting Started with Local Development

---

You can build the MuPDF.js library from source by referring to [BUILDING.md](#).

## Contributing

---

To contribute please open up (or help answer!) an Issue on our **Github** board and create a Pull Request (PR) for review. Find us on **Discord** at [#mupdf-js](#) to chat with us directly.
